

12.12.2025

To whom it may concern,

I am pleased to provide a reference for **MES MARINE and Mr. Emre Şandan and his team**, who delivered a broad range of consultancy, engineering, planning, and quality-control services for Sirena Marine's superyacht projects.

MES MARINE contributed its expertise to the **Sirena Superyachts Steel & Aluminium Series (34 m, 42 m, 50 m)** delivering high-level support throughout their engagement.

Throughout this period, MES MARINE diligently supported our internal project teams and consistently delivered high-quality outputs within the agreed timelines. The company's ability to manage complex technical details, interact effectively with class and flag authorities, and structure engineering deliverables in line with project requirements was clearly evident during its involvement.

For the **Sirena Superyachts 34 m, 42 m, 50 m Series**, MES MARINE successfully provided the following services (**2022–2024**):

- Design & engineering drawings optimisation, support and development
- Technical specification writing & Material and equipment selection
- Class & flag consultancy
- Pre-budgetary and pre-cost calculations

MES MARINE actively participated in project meetings with our engineering teams, designers, and class and flag surveyors, contributing significantly to technical decision-making processes and overall project coordination.

The professionalism, technical depth, structured approach, and consistent communication demonstrated by MES MARINE have greatly supported the progress and quality of our yacht projects. We confidently state that they will be an asset to any project they undertake.

Please feel free to contact me should you require any further information.

Yours sincerely,

Çağın Genç

CEO
